

IRIS FHIR[®] Accelerator Service Contest Webinar

05/10/2021

Patrick W. Jamieson, M.D.
Product Manager, IRIS for Health

InterSystems IRIS FHIR® Accelerator Service

- The FHIR App revolution
- Major use cases
- IRIS FHIR Accelerator Service – features and ease of use
- Demo
- Q/A

Health I.T. Goals – Across the World

- Better transparency into the cost and outcomes of care
- Convenient access to medical records
- An app economy for innovation and choice

FHIR is the glue to make all these goals possible

Priority FHIR use cases

2020 CitiusTech Interoperability & FHIR
Readiness Survey

Recent Ad from HL7[®]

Did you know that top healthcare professionals are using HL7 FHIR[®] to improve and advance modern healthcare?

Recently, [Rimidi partnered with Emory Orthopaedics](#) to develop a pair of FHIR-enabled apps to track surgical procedure data and collect outcome measures for patients undergoing orthopedic surgery at Emory Healthcare. FHIR opened up the opportunity to bridge communication between patients and clinicians outside of the hospital building.

FHIR Use Cases from Recent AWS Survey

- SMART On FHIR 1
- Personalized Medicine 2
- HEDIS Compliance 1
- Drug Utilization 4
- Holistic Health 1
- Chronic Disease Management 1
- Covid-19 Statistics 1
- Predictive Analytics 1
- Readmissions 1
- Appointment No-Shows 1
- Patient Satisfaction Surveys 2
- CMS Compliance 1
- Population Health 2
- Billing Compliance 2
- Protocol Compliance 1
- Scheduling 2
- Exploratory, no clear use case 14

InterSystems Platform Gives You Choices

On Premises

You manage applications,
data, servers, storage,
runtime and networking

Infrastructure

You manage applications, data,
and runtime

Managed Service

You manage applications and
data.

IRIS FHIR[®]
Accelerator
Service
(Managed)

InterSystems Provides

- Infrastructure – high availability, operating systems, servers, network, runtime, FHIR storage
- Management – backups, disaster recovery
- Development Portal – easy to test and develop with the FHIR API
- Monitoring – performance, utilization, cost
- Security – required by HIPAA

Note: Release Date for Europe and Asia/Pacific is not known at this time.

Deployed Configuration

Full encryption at rest and transit

High-availability across 2 availability zones

Managed backup/restore

Full logging/monitoring/audit

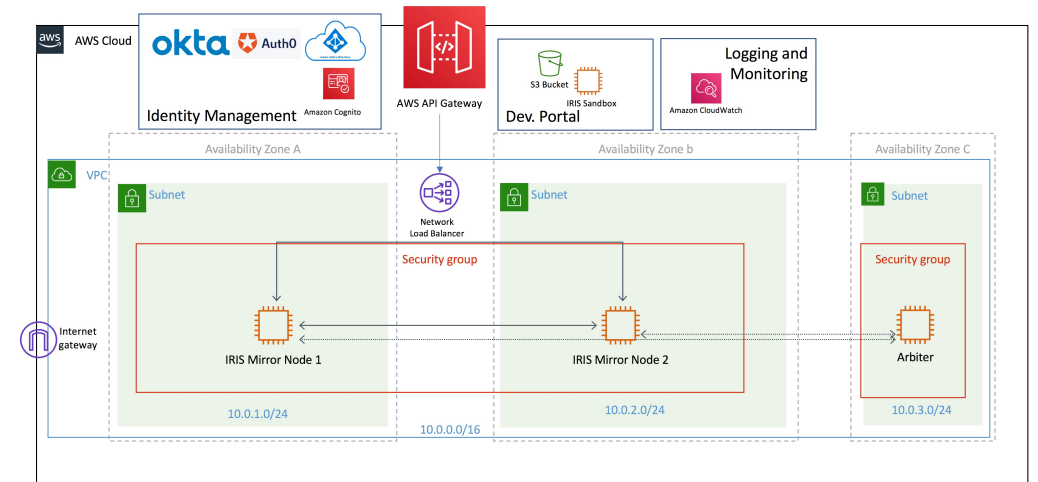

OAuth2-based authentication. Build-in or BYO identity provider

Secured S3 and VPC connections to customer's account

Full tenant isolation

API level security DDoS, throttling.. full power of AWS

API browser/development portal

FHIR API for Developers

- API first development
- Access FHIR® resources using an OpenAPI spec
- All 133+ resources annotated
- Example documents

The screenshot displays the InterSystems FHIR API Browser interface. At the top, it shows the logo and 'InterSystems FHIR® Server API Browser'. A dropdown menu on the right is set to 'Patient'. The main heading is 'FHIR R4 Patient Resource' with version indicators '1.0' and 'OAS3'. Below this, it says '/Patient.json' and 'Information about an individual or animal receiving health care services'. A 'Servers' dropdown is set to 'https://4rx6irq13b.execute-api.us-east-2.amazonaws.com' with an 'Authorize' button. The 'Patient' resource details are shown, including a 'POST /Patient' endpoint with a 'Try it out' button. The 'Parameters' section is empty. The 'Request body' section shows a dropdown set to 'application/fhir+json'. An 'Examples' dropdown is set to 'patient-example-infant-mom.json'. Below this, there are tabs for 'Example Value' and 'Schema'. The 'Example Value' tab is active, showing a JSON snippet:

```
{
  "resourceType": "Patient",
  "id": "infant-mom",
  "text": {
    "status": "generated",
    "div": "<div xmlns='http://www.w3.org/1999/xhtml'><p><b>Generated Narrative with Details</b></p><p><b>id</b>: infant-mom</p><p><b>name</b>: Leia Solo (OFFICIAL), Leia Organa (Maiden)</p><p><b>gender</b>: female</p><p><b>birthDate</b>: 12/10/1995</p><p><b>maritalStatus</b>: Married <span>(Details : {http://terminology.hl7.org/CodeSystem/v3-MaritalStatus code 'M' = 'Married', given as 'Married'})</span></p><p><b>generalPractitioner</b>: <a>Too-Onebee</a></p></div>"
  },
  "name": {
```

Questions and Answers
